

# Auxiliary Power Unit Hatz Diesel 1B30

Complete unit shown

## Product Profile

eCycle's high efficiency DC generators powered by Hatz

eCycle's high efficiency generators and auxiliary power units deliver up to ten times the current of other products presently on the market. eCycle's APU was designed to answer industry's demand for lightweight, high efficiency mobile DC power solutions in compliance with anti-idling laws that are being mandated throughout the United States and Canada. These units are ideal for vehicles requiring DC power as part of a total generation system, in addition to hybrid platforms.

## Quick Specs

### Rating

4kW

### Generator

eCycle Brushless

### Output Voltage

14VDC

### Current Limit

300A

### Cooling

Air

### Dimensions

W - 14" (35.6cm)

L - 18.5" (47cm)

H - 17" (40.6cm)

### Weight

85lbs/40kg

### Enclosure

Optional

- Compact and Lightweight
- Built-in starting capacity
- Significantly reduces fuel and maintenance costs
- Features eCycle's SolidSlot™ brushless motor/generator

- Mobile Power Trucks/Rail
- Defense/Military  
(28V available w/regulator - contact factory)
- Home Backup/CoGen
