

# Auxiliary Power Unit Kubota Super Mini Series

Complete unit shown with Kubota Z602 with liquid-cooled remote commutator and liquid-cooled exhaust manifold for marine applications.

## Product Profile

eCycle's high efficiency DC generators powered by Kubota

eCycle's high efficiency generators and auxiliary power units deliver up to ten times the current of other products presently on the market. eCycle's APU was designed to answer industry's demand for lightweight, high efficiency mobile DC power solutions in compliance with anti-idling laws that are being mandated throughout the United States and Canada. These units are ideal for vehicles requiring DC power as part of a total generation system, in addition to hybrid platforms.

## Quick Specs

### Rating

6/11kW

### Generator

eCycle Brushless

### Output Voltage

14/28 VDC

### Current Limit

400A

### Cooling

Liquid

### Dimensions

W - 17" (40.6cm)

L - 23" (58.4cm)

H - 22" (58.9cm)

### Weight

166lbs/73.3kg

eCycle APU Kit shown

- Mobile Power Trucks/Rail
- Defense/Military
- Marine
- Home Backup/CoGen
- Hydraulic pump may be added
